PROFESSIONAL SUMMARY

Aspiring developer with hands-on experience creating web applications using **Node.js, JavaScript, and RESTful APIs** with a strong sense in Frontend Development. Quick to learn new technologies, with strong analytical abilities and a detail-focused approach. Passionate about leveraging code to solve practical problems and dedicated to building solutions that have a meaningful real-world impact.

EDUCATION

Life Choices Academy   Lansdowne, Cape Town
Full Stack Web Development Certificate   April 2025 – September 2025
Courses: Back-end, Front-end, Restful APIs

Westridge High School   Westridge, Cape Town
High School Diploma (Bachelor's Pass)   January 2017 - December 2021
Subjects: Life Science, Life Orientation, Mathematics, Physical Science, Geography, English, Afrikaans

CERTIFICATIONS AND SKILLS PROFILE

Certification: Intro to Cybersecurity (CISCO), Intro to Data Science (CISCO), Introduction to Cloud (IBM)
Development Technologies: Python, PHP, HTML, CSS, JavaScript, Bootstrap, Vue.js, Node.js, Express.js, React.js, Version Control, Figma, Flutter
Databases: MySQL, OracleSQL, Oracle APEX
Security: jsonwebtoken, bcryptjs
Deployment Tools: Github

PROJECT EXPERIENCE

Project: FullStack HR Management System - LCA   June 2025 – August 2025
Developed a comprehensive HR platform to streamline salary processing, employee reviews, and department-level data management.
- Designed and deployed RESTful APIs with **Node.js, Express, and MySQL** to support payroll operations and ensure secure data handling.
- Built a responsive **Vue.js** interface for presenting employee details, salary history, and live review feedback.
- Introduced automation and input validation features to enhance data reliability, covering payroll generation and performance ratings.

Project: Fullstack eCommerce Platform – LCA   August 2025
Developed a modern online store for **"ICON"**, featuring a curated collection of anime-inspired apparel, secure checkout, and a smooth shopping experience for fans.
- Built a mobile-friendly front-end using **JavaScript, HTML, and CSS**, ensuring intuitive navigation and visually engaging product displays.
- Implemented backend functionality with **Node.js, MySQL, and JWT** to manage user accounts, orders, and inventory.
- Integrated PayPal for secure payments.
- Created a product catalogue and admin dashboard for inventory checks and customer logins.

Project: Price Comparison Mobile Application (MVP) - LC Studio   November 2025 - December 2025
Developed a mobile price comparison application (using Flutter) MVP that allowss users to search for products, compare prices across multiple retailers, and filter results using clean, user-friendly interface.
- Implemented a functional search bar allowing users to search for products and display mock comparison data from multiple retailers.

- Developed a filter and sorting interface enabling users to refine results by price (low to high, high to low) with immediate frontend updates.
- Built reusable Flutter UI components to ensure consistent design across search, comparison, and filter screens.
- Worked with mock datasets to simulate retailer pricing while clearly communicating demo-only data usage through disclaimers.
- Quickly upskilled in Flutter to deliver core frontend features on time, contributing directly to the successful completion of the MVP.
